Introduction to Emergency Management, Fifth Edition, offers a fully up-to-date analysis of US emergency management principles. In addition to expanding coverage of risk management in a time of climate change and terrorism, Haddow, Bullock, and Coppola discuss the impact of new emergency management technologies, social media, and an increasing focus on recovery. They examine the effects of the 2012 election results and discuss FEMA ' s controversial National Flood Insurance Program (NFIP). Introduction to Emergency Management, Fifth Edition, gives instructors and students the best textbook content, instructor-support materials, and online resources to prepare future EM professionals for this demanding career. Introduction to FEMA's Whole Community disaster preparedness initiative Material on recent disaster events, including the Boston Marathon Bombing (2013), Hurricane Sandy (2012), the Joplin Tornado (2011), the Haiti Earthquake (2011), and the Great East Japan Earthquake (2010) New and updated material on the Department of Homeland Security and the ongoing efforts of the emergency management community to manage terrorism hazards Top-of-the-line ancillaries that can be uploaded to Blackboard and other course management systems.

Comprehensive Preparedness Guide (CPG) 101 provides Federal Emergency Management Agency (FEMA) guidance on the fundamentals of planning and developing emergency operations plans (EOP). CPG 101 shows that EOPs are connected to planning efforts in the areas of prevention, protection, response, recovery, and mitigation. Version 2.0 of this Guide expands on these fundamentals and encourages emergency and homeland security managers to engage the whole community in addressing all risks that might impact their jurisdictions. While CPG 101 maintains its link to previous guidance, it also reflects the reality of the current operational planning environment. This Guide integrates key concepts from national preparedness policies and doctrines, as well as lessons learned from disasters, major incidents, national assessments, and grant programs. CPG 101 provides methods for planners to: Conduct community-based planning that engages the whole community by using a planning process that represents the actual population in the community and involves community leaders and the private sector in the planning process; Ensure plans are developed through an analysis of risk; Identify operational assumptions and resource demands; Prioritize plans and planning efforts to support their seamless transition from development to execution for any threat or hazard; Integrate and synchronize efforts across all levels of government. CPG 101 incorporates the following concepts from operational planning research and day-to-day experience: The process of planning is just as important as the resulting document; Plans are not scripts followed to the letter, but are flexible and adaptable to the actual situation; Effective plans convey the goals and objectives of the intended operation and the actions needed to achieve them. Successful operations occur when organizations know their roles, understand how they fit into the overall plan, and are able to execute the plan. Comprehensive Preparedness Guide (CPG) 101 provides guidelines on developing emergency operations plans (EOP). It promotes a common understanding of the fundamentals of risk-informed planning and decision making to help planners examine a hazard or threat and produce integrated, coordinated, and synchronized plans. The goal of CPG 101 is to make the planning process routine across all phases of emergency management and for all homeland security mission areas. This Guide helps planners at all levels of government in their efforts to develop and maintain viable all-hazards, all-threats EOPs. Accomplished properly, planning provides a methodical way to engage the whole community in thinking through the life cycle of a potential crisis, determining required capabilities, and establishing a framework for roles and responsibilities. It shapes how a community envisions and shares a desired outcome, selects effective ways to achieve it, and communicates expected results. Each jurisdiction's plans must reflect what that community will do to address its specific risks with the unique resources it has or can obtain. Planners achieve unity of purpose through coordination and integration of plans across all levels of government, nongovernmental organizations, the private sector, and individuals and families. This supports the fundamental principle that, in many situations, emergency management and homeland security operations start at the local level and expand to include Federal, state, territorial, tribal, regional, and private sector assets as the affected jurisdiction requires additional resources and capabilities. A shared planning community increases the likelihood of integration and synchronization, makes planning cycles more efficient and effective, and makes plan maintenance easier.

This two-in one resource includes the Tactical Commanders and Staff Toolkit plus the Liaison Officer Toolkit. Defense Support of Civil Authorities (DSCA) enables tactical level Commanders and their Staffs to properly plan and execute assigned DSCA missions for all hazard operations, excluding Chemical, Biological, Radiological, Nuclear, high yield Explosives (CBRNE) or acts of terrorism. Applies to all United States military forces, including Department of Defense (DOD) components (Active and Reserve forces and National Guard when in Federal Status). This hand-on resource also may be useful information for local and state first responders. Chapter 1 contains background information relative to Defense Support of Civil Authorities (DSCA) including legal, doctinal, and policy issues. Chapter 2 provides an overview of the incident management processes including National Response Framework (NRF), National Incident Management Systems (NIMS), and Incident Command System (ICS) as well as Department of Homeland Security (DHS). Chapter 3 discusses the civilian and military responses to natural disaster. Chapter 4 provides a brief overview of Joint Operation Planning Process and mission analyis. Chapter 5 covers Defense Support of Civilian Authorities (DSCA) planning factors for response to all hazard events. Chapter 6 is review of safety and operational composite risk management processes Chapters 7-11 contain Concepts of Operation (CONOPS) and details five natrual hazards/disasters and the pertinent planning factors for each within the scope of DSCA.

Instructor Guide for the FEMA course to become a CERT team member. It contains the same information as the pdf which can be downloaded from FEMA.gov at no cost. This book contains additional helpful tabs and pages for notes.

Course OverviewThis is a web-based training course on the National Incident Management System (NIMS) Incident Command System (ICS). The course is designed to provide training through an independent study vehicle on the use of ICS forms.Course Objectives:*The participant will be able to describe the goals and objectives of the IS-201 course.*The participant will be able to identify and describe how an IAP is developed and implemented following the primary phases of the planning process.*The participant will be able to identify and describe the standard ICS forms that are used to support the development of an IAP and their importance for effective information management.*The participant will be able to identify and describe sources of information that provide input for composing ICS tactical and safety worksheet forms, and how those forms are used to develop information needed for key elements of the IAP consistent with the Planning "P".*The participant will be able to identify and describe the various ICS forms used for the development of the IAP, and the ICS staff positions responsible for gathering the information needed.*The participant will be able to identify and describe the purpose of supplemental ICS forms and documents needed to assist with information collection and dissemination needed during an incident. *The participant will be able to summarize the IS-201 course, citing key components of the course.Primary AudienceThe Target Audience for this course are the emergency management and response personnel who may be called upon to function in a Command, General Staff, or Unit Leader position during a significant incident or event, and who may be called upon to help prepare some portion of the Incident Action Plan.

In the aftermath of 9/11, many law enforcement agencies (LEAs) shifted more resources toward developing counterterrorism (CT) and homeland security (HS) capabilities. This volume examines the effects the focus on CT and HS has had on law enforcement since 9/11, including organizational changes, funding mechanisms, how the shift has affected traditional crime-prevention efforts, and an assessment of benefits, costs, and future challenges.

Thisbook offers a regional paradigm for understanding the development of the traditions about Egypt and the exodus in the Hebrew Bible. It offers fresh readings of the golden calf stories in 1 Kings 12:25-33 and Exodus 32, the Balaam oracles in Numbers 22-24, and the Song of the Sea in Exodus 15:1b-18. From these and other biblical texts it paints a picture of the differing traditions about Egypt that circulated in Cisjordan Israel, Transjordan Israel, and Judah in the 8th century B.C.E. and earlier. "

This guidance was developed in coordination with Federal, State, tribal, and local Public Information Officers (PIOs). The goal of this publication is to provide operational practices for performing PIO duties within the Incident Command System (ICS). It offers basic procedures to operate an effective Joint Information System (JIS). During an incident or planned event, coordinated and timely communication is critical to effectively help the community. Effective and accurate communication can save lives and property, and helps ensure credibility and public trust. This Basic Guidance for Public Information Officers provides fundamental guidance for any person or group delegated PIO responsibilities when informing the public is necessary. The guidance also addresses actions for preparedness, incident response, Joint Information Centers (JICs), incident recovery, and Federal public information support. The guidance material is adaptable to individual jurisdictions and specific incident conditions.

Course Overview The course introduces participants to the concepts and principles of the National Response Framework. Course Objectives At the end of this course, you will be able to describe: The purpose of the National Response Framework. The response doctrine established by the National Response Framework. The roles and responsibilities of entities as specified in the National Response Framework. The actions that support national response. The response organizations used for multiagency coordination. How planning relates to national preparedness. Primary Audience This course is intended for government executives, private-sector and nongovernmental organization (NGO) leaders, and emergency management practitioners. This includes senior elected and appointed leaders, such as Federal department or agency heads, State Governors, mayors, tribal leaders, and city or county officials - those who have a responsibility to provide for effective response. Prerequisite: None CEUs: 0.3
