### Jerry Parsons' PLANTanswers:

Water your plants regularly. Getting the proper balance of water for houseplants can be tricky: too much water, and the roots will start to rot because of poor drainage, and too little water and they'll dry out. The specific amounts of water needed will vary from plant to plant, as some like to be very wet all the time while others (like cacti and succulents) only need watering once every few ...

### 3 Ways to Take Care of Plants - wikiHow

The three main parts are: the roots, the leaves, and the stem. Each part has a set of jobs to do to keep the plant healthy. The roots absorb water and minerals from the soil and anchor the plant in the ground. The stem supports the plant above ground, and carries the water and minerals to the leaves. The leaves collect energy from the Sun and make food for the plant, using an amazing process called photosynthesis.

### Lisa Briggs answers your plant questions

The plant manager should be inclusive to a point and be a listener. While the employees should not necessarily run the plant, the candidate should give them an effective voice. The plant manager should be able to find a way to achieve a consensus in the workplace in a manner that leaves all feeling respected. What to look for in an answer:
