Community colleges across the United States face a difficult challenge. On the one hand, they are "open access" institutions, with a mission to serve students from all backgrounds and at varying levels of college readiness. On the other hand, they must uphold high academic standards in order to maintain accreditation and prepare students for employment or transfer to four-year schools. How, then, can community colleges best serve students who want to learn but do not meet minimum academic standards? Chaffey College, a large community college located about 40 miles east of Los Angeles, began to wrestle with this question early in the twenty-first century. Under the auspices of a national demonstration project called Opening Doors, Chaffey developed a program designed to increase probationary students' chances of succeeding in college. Chaffey's program included a "College Success" course, taught by a counselor, which provided basic information on study skills and the requirements of college. As part of the course, students were expected to complete five visits to "Success Centers," where their assignments, linked to the College Success course, covered skills assessment, learning styles, time management, use of resources, and test preparation. In 2005, MDRC collaborated with Chaffey College to evaluate the one-semester, voluntary Opening Doors program. In 2006, the program was improved to form the two-semester Enhanced Opening Doors program, in which probationary students were told that they were required to take the College Success course. In MDRC's evaluation of each program, students were randomly assigned either to a program group that had the opportunity to participate in the program or to a control group that received the college's standard courses and services. This report presents the outcomes for both groups of students in the Enhanced Opening Doors evaluation for four years after they entered the study. The findings include: (1) The message matters--optional program activities had lower participation rates compared with required program activities; (2) Chaffey's Enhanced Opening Doors program had positive short-term effects; and (3) Despite the program's encouraging short-term effects, it did not meaningfully improve students' long-term academic outcomes. This report presents detailed findings from Chaffey's Enhanced Opening Doors initiative, including the cost and cost-effectiveness of the program, and considers the implications of this research for designing services for probationary students in community college. Appended are: (1) Sample Characteristics at Baseline, by Research Group, and Supplementary Four-Year Impact Tables; (2) Measure Creation; and (3) Statistical Model for the Impact Analysis. Individual chapters contain footnotes. (Contains 20 tables, 7 figures and 1 box.) [Additional funding for this paper was provided by the MacArthur Foundation Research Network on Socioeconomic Status and Health and the MacArthur Foundation Research Network on Transitions to Adulthood. For "Serving Community College Students on Probation: Four-Year Findings from Chaffey College's Opening Doors Program. Executive Summary," see ED526394.]

Community colleges enroll half of the nation's undergraduates. Yet only 40 percent of entrants complete an undergraduate degree in six years. Redesigning America's Community Colleges explains how two-year colleges can increase their students' success rate quickly and at less cost, through a program of guided pathways to completion.

Nearly two-thirds of students require some form of remediation before taking college-level classes, and community colleges have become increasingly important in providing this education. Unfortunately, relatively few students complete the developmental courses required to make a transition to college-level work. Based on a three-year study of over twenty community colleges, Basic Skills Education in

Get Free Chaffey College Placement Test

Community Colleges analyzes developmental education practices, exploring what goes wrong and what goes right, and provides a series of recommendations for improved practice. Including both classroom observations and interviews with administrators, faculty, and students, this valuable book balances critique with examples of innovation. Part One explores the instructional settings of basic skills—the use of drill and practice and remedial pedagogy in math, reading, writing, and ESL, as well as innovations in colleges that show developmental education need not follow remedial pedagogy. Part Two examines institutional factors shaping basic skills and provides recommendations for improving the quality of basic skills instruction. The research-grounded observations and recommendations in Basic Skills Education in Community Colleges make this an invaluable resource for scholars, administrators, and faculty aiming to help students progress through developmental education to college-level work and beyond.

Catholic High School Entrance Exams is a comprehensive guide that provides expert advice, practical tips, and a lot of practice, giving eighth graders the study tools and reassurance they need to achieve a high score on their Catholic high school entrance exam.
