Can't help you specifically, but I had to fix my Fluke 6060B and the chore was made easier by the following two observations: 1) there are several frequency bands in this unit and sometimes things will behave differently in a bad (or good) band, and 2) the main RF synthesizer is laid out just like the block diagram, so it pretty simple to take a scope and just work your way through.

I have found the operators manual online and downloaded it. I have also found and downloaded service manuals for the 6082A and also the FLUKE 6080A/AN. These are not exactly the same. Those manuals are available nearly everywhere. The Gigatronics and the Fluke 6080A are probably the same instrument. They cover 10KHz to 1056MHz.
