What activities might a teacher use to help children explore the life cycle of butterflies? What does a science teacher need to conduct a "leaf safari" for students? Where can children safely enjoy hands-on experience with life in an estuary? Selecting resources to teach elementary school science can be confusing and difficult, but few decisions have greater impact on the effectiveness of science teaching. Educators will find a wealth of information and expert guidance to meet this need in *Resources for Teaching Elementary School Science*. A

Testing expert W. James Popham cuts through the jargon and the hype to provide the definitive nuts-and-bolts introduction to formative assessment, a process with the power to completely transform teaching and learning. In his inimitable style, Popham explains the research supporting formative assessment's effectiveness and why familiarity with this research is the key to preserving both teacher sanity and district funds. You'll find step-by-step guidance on how to build frameworks for formative assessment and how to carry out each of the process's four levels: teachers' instructional adjustments, students' learning tactic adjustments, a classroom climate shift, and schoolwide
