The equation is exact.

$f'_x = y + y \cos xy$  implies that  $f(x, y) = xy + \sin xy + \phi(y)$ .  
 $f'_y = x + x \cos xy$  implies that  $x + x \cos xy + \phi'(y) = x + x \cos xy$ , so  $\phi'(y) = 0$  and  $f(x, y) = xy + \sin xy$ . The implicit solution is  $xy + \sin xy = C$ .

Given the cylinder and sphere whose equations in cylindrical coordinates are  $r = a \sin \theta$  and  $r^2 + z^2 = b^2$ , with  $a < b$ , show that: (a) The area of the part of the cylinder that lies inside the sphere is  $4abE(a/b, \pi/2)$ . (b) The area of the part of the sphere that lies inside the cylinder is  $2b^2 [\pi - 2E(a/b, \pi/2)]$ . 13.

Differential equations lie at the core of the physical sciences and engineering and are proving increasingly valuable in biology and medicine. Simmons' book will not appeal to readers who want merely recipes with examples of their use. Such readers might prefer the excellent books from the Schaum's Outline Series.
