Harley engines have a single-pin crankshaft, giving these engines a unique sound. We'll have more on that distinctive sound in the next section. In 2001, Harley made what was for it a radical move. A new engine called the Revolution™ engine was introduced, to be used in the upcoming 2002 VSRC. The Revolution is still a V-twin but it has a 60-degree V, is water-cooled, has 4 overhead camshafts and is high-revving (9,000 RPM redline).

How Harley-Davidson Works | HowStuffWorks

The Harley-Davidson Sportster is a line of motorcycles produced continuously since 1957 by Harley-Davidson. Sportster models are designated in Harley-Davidson's product code by beginning with "XL". In 1952, the predecessors to the Sportster, the Model K Sport and Sport Solo motorcycles, were introduced.

### Harley Davidson Ironhead Sportster Engine Diagram

The VIN code of the motorcycle can tell you as much information as the DNA of a human being. With the help of the Harley VIN decoder, you can find out the technical specs about the body of the bike, the engine type and the equipment that comes with the bike. However, the DNA remains unchanged while the codes of the bikes become different from time to time.
