Glossary - ThinkCentral

Well, acid precipitation is the cause of a lot of it, and it happened in only 30 years. Acid Precipitation, or what you have probably heard called acid rain, is one of many environmental problems...

Acid Precipitation: Definition, Causes & Effects - Video ...

When these acidic vapors condense into liquid droplets, the result is acid rain. Acid rain has both direct and indirect effects on organisms. Direct effects include the death of aquatic plants and animals and the injury and death of trees that take up acidic water. Indirect effects include the leaching of elements from soil and the deaths of organisms that depend on other organisms killed directly by acid rain.

Lab-Testing Acid, Tracking Rain

Acid precipitation is precipitation such as rain, sleet, or snow that contains a high concentration of acids. When fossil fuels are burned, they release oxides of sulfur and nitrogen. When the oxides combine with water in the atmosphere, they form sulfuric acid and nitric acid, which fall as acid precipitation.
