Following are the 7 main difference between hydraulics and pneumatic: In hydraulics and pneumatics, hydraulics is liquid and pneumatics is gas. And, the main difference between these two is, Hydraulic systems use liquids like water and oil to transmit power. Where pneumatic systems use air to transmit power. In hydraulics, liquids are relatively incompressible. Liquids have high specific mass and have a free surface.

Question 10. What Are The Differences Between Pneumatics And Hydraulics? Answer : Working fluid: Pneumatics use air, Hydraulics use Oil; Power: Pneumatic power less than hydraulic power; Size: P components are smaller than H components; Leakage: Leaks in hydraulics cause fluid to be sticking around the components.
