

This book constitutes selected papers from the Second International Workshop on IoT Streams for Data-Driven Predictive Maintenance, IoT Streams 2020, and First International Workshop on IoT, Edge, and Mobile for Embedded Machine Learning, ITEM 2020, co-located with ECML/PKDD 2020 and held in September 2020. Due to the COVID-19 pandemic the workshops were held online. The 21 full papers and 3 short papers presented in this volume were thoroughly reviewed and selected from 35 submissions and are organized according to the workshops and their topics: IoT Streams 2020: Stream Learning; Feature Learning; ITEM 2020: Unsupervised Machine Learning; Hardware; Methods; Quantization.

This volume ties together the histories of Japan and China for the modern period prior to the 20th century. The chapters look at Chinese and Japanese works which were written in response to events in the other country. None of these works has received any sustained attention in the west. As a result we get a view of how Chinese and Japanese saw each other at a time when there were few personal contacts allowed. Many of these texts were built on fanciful embellishments of stories that migrated from one land to the other. But the unique qualities of the Sino-Japanese cultural bond seem to have conditioned the interaction so that these texts all reveal a fascinatingly well-defined area.
