Performance Management Galera Cluster MariaDB Galera Cluster comes with many notable features that are not available in standard MySQL replication (or Group Replication); automatic node provisioning, true multi-master with conflict resolutions and automatic failover.

*Improve Performance of Galera Cluster for MySQL or MariaDB ...*

MariaDB includes specialized improvements for FusionIO devices, leveraging a feature of the NVMFS filesystem on these popular, high performance solid state disks. Using this feature, MariaDB 10 can eliminate some of the overhead within the InnoDB storage engine when used with FusionIO devices.

*Significant performance boost with new MariaDB page ...*

Good overview, but short on meaningful content -- totally misleading title. Aside from simply listing features, common usage, and some basic examples, there is no in-depth discussion, analysis that one would expect from a book that titles itself "MariaDB High Performance" -- instead, a more appropriate title would be "Introduction to MariaDB: A Brief Overview."
