Here is the extraordinary story of the most consequential campaign of the Pacific War- the U.S. Fifth Fleet's seizure of the Marianas, a relentless deployment of overwhelming force on air, land, and sea that opened the path to total victory over Japan and established a new state of the art in warfare- the first use of the forerunners of today's SEALs; the emergence of massive cross-hemispheric expeditionary operations; the flowering of American naval aviation and carrier power; and the secret training of Marianas-based air crews who would first unleash nuclear fire. From the epic seaborne invasion of Saipan, to the stunning aerial battles of the Marianas Turkey Shoot, to the grinding combat ashore and the devastating bombing campaign that culminated with Hiroshima and Nagasaki, the Marianas were the fulcrum of the Pacific, a kaleidoscope of valor, drama, and tragedy. Story Locale- The Marianas, Central Pacific, 1944.

The terrifying new role of technology in a world at war

Draws on interviews with veterans and new primary sources to present a narrative account of the pivotal World War II campaign, chronicling the three-month effort to gain control of Guadalcanal as a battle that taught the U.S. Navy and Marines new approaches to warfare.

BUPERS 1610.1B

This volume examines crimes that violate environmental regulations, as part of an emerging area of criminology known as green criminology. The contributions to this book examine criminal justice concerns related to regulating and enforcing environmental laws, as well as the consequences for families and communities impacted by hazardous waste and pollution. It also describes possible strategies for deterring and preventing organized crime related to environmental regulations, including black market sales of ozone depleting substances. This innovative volume provides a criminological framework for understanding environmental harms. Examining cases from the US, Europe and Australia, this volume compares and contrasts international approaches for regulating hazardous substances, and enforcing those regulations. This work will be of interest to researchers in criminology and criminal justice, particularly interested in green criminology or environmental law, as well as researchers in environmental sciences, white collar and corporate crime, and policymakers.

Following the success of his recent book on Navy SEALs in Iraq, *The Sheriff of Ramadi*, bestselling author and combat veteran Dick Couch now examines the importance of battlefield ethics in effectively combating terrorists without losing the battle for the hearts of the local population. A former SEAL who led one of the only successful POW rescue operations in Vietnam, Couch warns that the mistakes made in Vietnam forty years ago are being repeated in Iraq and Afghanistan, and that the stakes are even higher now. His book takes a critical look at the battlefield conduct of U.S. ground-combat units fighting insurgents in Iraq and Afghanistan. Since the prize of the fight on the modern battlefield is the people, he warns every death has a consequence. Every killing has both strategic and moral significance for U.S. warriors. From his unique and qualified perspective, Couch examines the sources and issues that can lead to wrong conduct on the battlefield, and explains how it comes about and what can be done to correct it. He considers the roles of command intent and the official rules of engagement, but his primary focus is on ethical conduct at the squad and platoon level. Tactical ethics, according to the author's definition, is the moral and ethical armor that should accompany every American warrior into battle, and these

standards apply to the engaged unit as well as to the individual. A harsh critic of immoral combat tactics, Couch offers realistic measures to correct these potentially devastating errors. He argues that as a nation, we must do all we can to protect our soldiers humanity, for their sake, so they can return from service with honor, and for our sake as a people and for our standing in the world.
