Paul Pimsleur spent his career researching and perfecting the precise elements anyone can use to learn a language quickly and easily. Here are a few of his "secrets": The Principle of Anticipation In the nanosecond between a cue and your response, your brain has to work to come up with the right word. Having to do this boosts retention, and cements the word in your mind. Core Vocabulary Words, phrases, and sentences are selected for their usefulness in everyday conversation. We don't overwhelm you with too much, but steadily increase your ability with every lesson. Graduated Interval Recall Reminders of new words and structures come up at the exact interval for maximum retention and storage into your long-term memory. Organic Learning You work on multiple aspects of the language simultaneously. We integrate grammar, vocabulary, rhythm, melody, and intonation into every lesson, which allows you to experience the language as a living, expressive form of human culture. Learning in Context Research has shown that learning new words in context dramatically accelerates your ability to remember. Every scene in every Pimsleur lesson is set inside a conversation between two people. There are no drills, and no memorization necessary for success. Active Participation The Pimsleur Method + active learner participation = success. This method works with every language and every learner who follows it. You gain the power to recall and use what you know, and to add new words easily, exactly as you do in English. The Russian Language Russian, one of the six official languages of the United Nations, is the official language in Russia, Belarus, Kazakhstan and Krygystan, with an estimated 150 million native speakers around the world. Pimsleur's Russian uses speakers from Moscow and St. Petersburg, which accounts for slight pronunciation differences between speakers, but accurately depicts contemporary spoken Russian.
