Reptiles and amphibians have major physical differences. Reptiles have dry and scaly skin, whereas amphibians feel moist and sometimes rather sticky. They are vertebrates and cold blooded like amphibians. As compared to reptiles, amphibians have smooth skin. The skin of most amphibians is not water-proof unlike reptiles.

### [Amphibians and Reptiles - Froglife](#)

Herpetology is the branch of zoology that studies reptiles (turtles/tortoises, snakes, lizards, crocodilians, tuataras) and amphibians (frogs/toads, caecilians, salamanders/newts). The word herpetology comes from the Greek work herpes which means "to crawl" and refers to the way these animals move around close to the ground.
