SRM Easwari Engineering College (SRM EEC) is a private self-financing institute established in 1996 by the Sri Ramaswamy Memorial (SRM) group with the approval of the Government of Tamil Nadu and AICTE.

This book is a collection of high-quality peer-reviewed research papers presented at International Conference on Recent Trends in Computing (ICRTC 2021) held at SRM Institute of Science and Technology, Ghaziabad, Delhi, India, during 4 – 5 June 2021. The book discusses a wide variety of industrial, engineering and scientific applications of the emerging techniques. The book presents original works from researchers from academic and industry in the field of networking, security, big data and the Internet of things.

This book covers selected high-quality research papers presented in the International Conference on Cyber Security, Privacy and Networking (ICSPN 2021), organized during 17-19 September 2021 in India in Online mode. The objectives of ICSPN 2021 is to provide a premier international platform for deliberations on strategies, recent trends, innovative approaches, discussions and presentations on the most recent cyber security, privacy and networking challenges and developments from the perspective of providing security awareness and its best practices for the real world. Moreover, the motivation to organize this conference is to promote research by sharing innovative ideas among all levels of the scientific community, and to provide opportunities to develop creative solutions to various security, privacy and networking problems.

Environmental and Health Management of Novel Coronavirus Disease (COVID-19) examines mitigation measures that can be adopted at the time of a novel coronavirus outbreak to lessen environmental contamination and impacts on human health. The book discusses origin, structure and pathogenesis, epidemiology, environmental transmission and the potential spread routes of COVID-19 via surfaces, air, water, wastewater, medical waste and food products. It also covers guidelines and protocols for setting safety conditions to provide adequate health care and reduce the risk of infection in health and non-healthcare settings, along with preventative measures and disinfection technologies. In addition, the book discusses challenges, opportunities and future perspectives, the global crisis, and global consequences on the environment and health. With contributions from experts, this book presents a multidisciplinary reference resource for virologists, microbiologists, public health professionals, environmental health managers and others engaged in the study and mitigation of the environmental and health impacts of the virus. Covers the environmental transmission and spread of COVID-19 Includes environmental disinfection technologies for prevention of COVID-19 Provides guidelines, standards and protocols related to COVID-19

In the last two decades, machine learning has developed dramatically and is still experiencing a fast and everlasting change in paradigms, methodology, applications and other aspects. This book offers a compendium of current and emerging machine learning paradigms in healthcare informatics and reflects on their diversity and complexity. Machine Learning Approaches and Applications in Applied Intelligence for Healthcare Data Analytics presents a variety of techniques designed to enhance and empower multi-disciplinary and multi-institutional machine learning research. It provides many case studies and a panoramic view of data and machine learning techniques, providing the opportunity for novel insights and discoveries. The book explores the theory and practical applications in healthcare and includes a guided tour of machine learning algorithms, architecture design and interdisciplinary challenges. This book is useful for research scholars and students involved in critical condition analysis and computation models.

This book features a collection of high-quality research papers presented at the International Conference on Advanced Computing Technology (ICACT 2020), held at the SRM Institute of Science and Technology, Chennai, India, on 23 – 24 January 2020. It covers the areas of computational intelligence, artificial intelligence, machine learning, deep learning, big data, and applications of artificial intelligence in networking, IoT and bioinformatics

Sustainable Bioprocessing for a Clean and Green Environment: Concepts and Applications highlights the importance of waste to health in which waste is safely converted to value-added products via bioprocess technologies. Providing fundamental concepts and applications, this book also offers readers the methodology behind the operation of a variety of biological processes used in developing valuable products from waste. Features: Discusses synthesis and use of environmentally friendly biobased materials, such as biopolymer films and biobased plasticizers Highlights nanotechnology applications in the treatment of pollution and emphasizes the synthesis of biogenic nanomaterials for environmental remediation Describes the use of biosurfactants and emerging algal technologies, such as applications of microalgae in nutraceuticals and biofuel production Details delignification for lignocellulosic biomass This interdisciplinary book offers researchers and practitioners in chemical engineering, environmental engineering, and related fields a broad perspective on fundamentals, technologies, and environmental applications of sustainable bioprocessing.

This book gathers selected papers presented at the Inventive Communication and Computational Technologies conference (ICICCT 2021), held on 25 – 26 June 2021 at Gnanamani College of Technology, Tamil Nadu, India. The book covers the topics such as Internet of things, social networks, mobile communications, big data analytics, bio-inspired computing, and cloud computing. The book is exclusively intended for academics and practitioners working to resolve practical issues in this area.

Looking for the career of your choice and don't want to take the beaten path? Then pick up this book and get ready for your dream career! The Ultimate Guide to 21st Century Careers is designed to provide you with all the information you need about new careers in a range of fields. Specially designed for the modern Indian student, it is the first book in years to give detailed overviews of job profiles under each field it covers, as well as offer a roadmap to students on how to get these jobs. In its pages you will find: ? Detailed information about the roles you can pursue in every field. ? Exercises that will help you assess your skill sets and interests, and correlate them to specific career paths. ? A comprehensive list of colleges, both in India and abroad, that offer courses in each field. ? Estimates of the salaries you could expect to earn in every profession and role. ? Testimonies from experts in different areas, providing a peek into their daily work lives. Whether you are interested in problem-solving or ideating, creating something new or working with people, this book is your one-stop compendium to finding your niche and excelling in it.
