Euell Gibbons (1911-1975) had an adventurous life to say the least. His first intro to wild foods was due to his family's poverty when they lived in New Mexico. At 12 years old, Gibbons went out in the surrounding country-side to forage for edibles to help feed his family and a life-long love of wild food got off to a pragmatic start.

Fifty years ago an unknown writer named Euell Gibbons (1911–1975) presented a book on gathering wild foods to the New York publisher David McKay Co. Together they settled on the title, Stalking the Wild Asparagus. No one expected that this iconic title would become part of the American language, nor did they anticipate the revival of interest in natural food and in environmental preservation in which this book played a major role.

"Stalking the Wild Asparagus" is both inspiring and educational. This, I believe, was the first book on wild edibles to be written, and Euell Gibbons earns his right to declare himself the father of the foraging movement, although he never did claim that. He just shared what he loved, and his excitement shines throughout the book.

Euell Gibbons was one of the few people in this country to devote a considerable part of his life to the adventure of "living off the land". His greatest pleasure was seeking out wild plants, which he made into delicious dishes. The plants he gathers and prepares in *Stalking the Wild Asparagus* are widely available everywhere in North America. There are recipes for delicious vegetable and casserole dishes, breads, cakes, muffins, and twenty different pies. He also shows how to make numerous jellies, jams, teas, and wines, and how to sweeten them with wild honey or homemade maple syrup.

This foraging and cooking classic was first published in 1964 and has continued to be one of America's most appreciated works on the subject of seafood. As a young man, Euell Gibbons kept his family alive during the Dust Bowl era by gathering wild foods. In later years he foraged for seafood all over the coastlines of North America and even Hawaii. He drew on his extensive experience and research to write his "Stalking" series, books which have entered the American lexicon and which remain the starting point for serious foragers. Euell Gibbons tells how to find marvelous food in every coastal area of North America. This book contains numerous drawings for identification and hundreds of recipes and cooking tips from chowders and clambakes to simple epicurean treats such as boiled periwinkles dipped in melted butter.

Having written the enormously popular *Stalking the Wild Asparagus* and *Stalking the Blue-Eyed Scallop*, Euell Gibbons turned his attention to the wealth of herbs that grow wild throughout North America. Combining the skills he learned as a boy with Indian lore and his years of patient experimentation, he wrote this book that others might enjoy the benefits of our little-known natural heritage. Euell Gibbons shows the reader how to enjoy the culinary and medicinal virtues of herbs and wild plants. Drawn from the author's wide knowledge of plants as well as from the lore of Native Americans and early settlers, the information is supplemented by nutritionists at Pennsylvania State University who worked with Gibbons on analysis of the entries.
