STUDY GUIDE: Evolution

What was Darwin's hypothesis? He decided that organisms change over time, or evolution. They become better adapted to new conditions. Over the next 20 years he gathered that plants and animals that arrived on the Galápagos Islands faced conditions that were different than those on the nearby mainland.

Evolution. Since the Scopes trial, evolution continues to be one of the most controversial scientific doctrines of all time. But in truth, the basic concept of evolution—the idea that species change over time to adapt to their environment—is quite simple, even obvious, once one thinks of it. After reading this book, you should be able not only to understand the basic concepts of evolution but to appreciate both what it does, and what it does not, accomplish.
