Read PDF The Microcomputer Industry In Brazil The Case Of A Protected High Technology Industry

A US/Brazil trade conflict on the Brazilian protectionist electronics policy developed during 1985-89. In that period and under the threat of trade sanctions, a few changes were made in the Brazilian policy. Major consequences of the conflict were felt after its conclusion. It was one important political factor among the forces that pushed for the opening of the Brazilian electronics market in the early 1990s.

The Politics of Capitalist Transformation is the only book-length study of the highly protectionist Brazilian informatics policy from its origins in the early 1970s to the collapse of the market reserve in the early 1990s and its impact in subsequent decades. Jeff Seward provides a sophisticated political analysis of how state activists constructed high levels of state autonomy to try to shift Brazil to a new variety of capitalism by eclipsing the multinational companies (especially IBM) that dominated the Brazilian computer sector and replacing them with local companies with 100 percent Brazilian technology and ownership. This ambitious policy required repeated shifts of political strategy and policymaking institutions to respond to a constantly changing economic and political environment as Brazil made a dramatic transition from military dictatorship to democracy. The innovative framework to analyze state autonomy and the sophisticated political analysis of the policymaking process will be of interest to scholars and students of Brazilian and Latin American political economy, varieties of capitalism

theory, state theory, democratic transition theory, and high technology policymaking in developing countries.

Released by the Prime Minister of India, Shri Atal Bihari Vajpayee on 24th May, 2003, this book brings together 3 top-ranking independent reports that outlining a comprehensive manufacturing policy framework for India.

Brazil is the most populous economy in Latin America with the second highest GDP among the emerging BRIC economies, after China, and the second per capita GDP among the BRIC economies after Russia. The objective of this book is to provide a thorough historical, statistical, and institutional description of the factors that affect and are affected by Brazil's international trade and integration with the world economy. It includes a most recent account of what is presently going on in Brazil and the type of economy from which Brazil is emerging. The authors use Brazil as a case study and explain both the process and the outcome of international economic integration by analyzing in each chapter a different contributing factor to the benefits and costs from Brazil's economic interdependency with the world economy. This makes the reading of this book extremely valuable. The topics addressed in this book will increase the reader's awareness of the institutional, economic, and cultural forces that shape the dynamism of Brazil's international trade and integration with the world economy, and will continue to do so in future years.

Includes articles on international business opportunities.

Local Content in Procurement is the first book of its kind. Recognizing the substantial economic and social value brought to host countries and local communities through the procurement practices of large private and public companies, this book by Dr Michael Warner – Director of the consultancy firm Local Content Solutions and former architect of the Local Content standards for BG Group – provides a first-hand account of the Local Content regulations, strategies and procurement processes needed to realise these social benefits. Acknowledging that the employment and industrial benefits of large-scale procurement have been sorely overlooked, this book is both a how-to manual and a thoughtful insight into the challenge of creating sustainable jobs and competitive national industries through expenditure on bought-in goods and services. With literally trillions of dollars of goods and services being procured over the next ten years in exploring and developing for oil, gas and mineral resources across the globe, the book focuses on these sectors, yet also has wide application to the utilities, construction, infrastructure, manufacturing and defence sectors. Local Content in Procurement has been written for those working for the procurement, strategy and social responsibility departments of major private and public companies and international suppliers, for industrial and economic policy-makers and regulators of local content, and for all those involved in the management of procurement expenditure to develop national and local industries.
