One World Trade Center and Two World Trade Center, commonly referred to as the Twin Towers, were designed by architect Minoru Yamasaki as framed tube structures, which provided tenants with open floor plans, uninterrupted by columns or walls. They were the main buildings of the World Trade Center.

World Trade Center (1973–2001) - Wikipedia

The Twin Towers were part of the original Wembley Stadium in London, England. They were constructed in 1923 on the site of Watkin's Tower in Wembley, and came to be recognised as one of the iconic symbols of English football in general and of Wembley Stadium in particular. They became grade II listed buildings in 1976, but they were demolished in 2003 to make way for the new Wembley Stadium .

September 11 attacks - Wikipedia

The Twin Towers II was a proposed twin-towered skyscraper complex which would have been located at the World Trade Center site in Manhattan, New York City. The proposed complex would have replaced the former Twin Towers of the World Trade Center destroyed in the September 11 attacks, restoring the skyline of the city to its former state. The main design for the proposed complex would feature new landmark twin towers, nearly identical to the originals designed by Minoru Yamasaki, though it would

What Were the Twin Towers? by Jim O'Connor, Who HQ ...

The towers were built using a new drywall system reinforced by steel cores, making them the first skyscrapers ever built without the use of masonry. The two towers – at 1368 and 1362 feet and 110 stories each – bested the Empire State Building to become the tallest buildings in the world.

A History of the World Trade Center Towers

He has also examined the Twin Towers' tenants and the companies that were doing construction work on the specific floors that were hit by the planes. In addition, Ryan authored Another 19: Investigating Legitimate 9/11 Suspects , which sheds light on a different group of potential suspects.

FAQ #1: Who demolished the Twin Towers and WTC ??

One of the unanswered questions about the events of September 11, 2001 is why the Twin Towers were destroyed in such an energetically outward manner. The destruction was neither typical of a fire related gravity-driven collapse nor of a controlled demolition using pre-planted explosives. The mechanism employed has baffled researchers since 9/11.
